

# THE BLAIRMORE ENTERPRISE

VOL. XVIII, NO. 87.

THE BLAIRMORE ENTERPRISE, THURSDAY, SEPTEMBER 15, 1927.

## BLAIRMORE KIDDIES

### ENTERTAINED BY ELKS

Thursday of last week will long be remembered by the kiddies of the local school, who on that day were guests of the local Elks to the Conklin & Garrett Circus.

The children were met at the school by the Elks' committee and each child received tickets entitling them to two rides on anything at the circus or en-

Owing to the bad weather and roads, it was again found necessary to postpone the Drewry sale from Wednesday afternoon to Wednesday next at 12.30.

trance to the various exhibits. The general expressions of appreciation shown by the kiddies well repaid the Elks for their enterprise.

Thomas Price is a patient in hospital at Bellevue, suffering from injuries received in a fall from the Bellevue tippie on Friday last. From last reports it appears he is doing well under the care of Dr. Reinhorn.

Major W. B. Burnett left Lethbridge yesterday for Hot Springs, Arkansas, where he will represent the Alberta Grand Lodge at the annual session of the Sovereign Grand Lodge, I.O.O.F.

## BLAIRMORE AND DISTRICT ENTERTAIN MINING CONGRESS

Probably at no point on the trip west from the Atlantic coast were members of the Empire Mining and Metallurgical Congress extended a more royal welcome than at Blairmore.

The special "Blue" train reached Blairmore from east at 2.35 prompt on Friday afternoon, and the one hundred and thirty-eight occupants immediately found themselves subjected to the care and hospitality of our local committee and people.

The party on the "Blue" train comprised representatives from no less than twenty-four different countries, men of high standing in the mining world who are interested in knowing other fields and methods of mining.

About fifty automobiles had been lined up near the depot to be placed at the disposal of the party and varied attractions offered made our guests feel right at home. Points of interest visited included the coal washery plants at Coleman, Bellevue and Blairmore; the Hillcrest Collieries' plant at Hillcrest; the Frank Slide, and the super-electric power plant at Crow's Nest Lake, all of which were viewed with keenest interest.

Return was made to Blairmore, where together with some sixty officials of the district coal companies and their wives or lady friends, the party sat to a very sumptuous banquet served under the auspices of the Rocky Mountain Branch of the Canadian Mining Institute at the spacious Tea Kettle Inn.

The chair for the banquet was occupied by Mr. Moses Johnson, local district mines inspector.

The toast to the congress, proposed by Mr. O. E. S. Whiteside, general manager of the International Coal & Coke Company, Limited, of Coleman, was very ably responded to on behalf of the guests by Mr. E. S. Andrews, government geologist of New South Wales, Australia. In the course of his interesting remarks, Mr. Andrews drew comparisons between the various major industries of Canada and those of the commonwealth of Australia. He also used as an illustration of his point the famous Maori war yell, which was much enjoyed. He realized how vastly great were the resources of Canada and congratulated this Dominion upon the progress she is making.

Mr. Cairns, of Wigan, England, was the next speaker. He felt that the congress had a mission to perform in telling Great Britain and other parts of the Empire of the opportunities for investment and industry in Canada, which he described as "a land for men and their sons."

Mr. George Kellogg, general manager of the McGillivray Creek Coal & Coke Company, Limited, Coleman, asked the delegates to tell little England what they had been without an exaggeration, and he had no fears as to the result to Canada and the Empire.

Major George Riley, the ever active train secretary, graced the banquet room with his presence and before dispersing extended the thanks of the congress for the very capable and hospitable manner in which they were received in Blairmore. Other speakers took occasion to mention that on no occasion since setting out on the congress tour were they so well received or greeted with such hearty hand-shakes and welcomes as here. Particularly were they pleased with the musical end of the programme. Several beautiful selections were rendered during the evening by the Upton orchestra, all of which were heartily applauded and enjoyed. A beautiful solo rendered by Mrs. Asbridge, of Coleman, was also well received, as was also two violin selections by Joe Jasbec, of Hillcrest, and piano duets by Misses Hazel and Er-

## DEATH OF W. I. HUSTON

News of the sudden death of Mr. William I. Huston, which occurred at Toronto on Sunday last, came as a distinct shock to the people of this community and district.

From information received, it appears that Mr. Huston's illness was of very short duration, the end coming following a brief and severe attack of heart trouble.

Mr. Huston had attained the age of fifty-nine years and eight months. He at the time of his death was on a holiday trip, part of which was being spent with relatives at Winnipeg and Toronto. While in the cast, he attended the annual session of the Grand Lodge of the B.P.O.E. at Hamilton only a week prior to his demise, as a special delegate from the Blairmore Lodge. He had planned on leaving Toronto Monday of this week for Detroit, where he was to meet some old friends, including Mr. R. W. Thompson, and later join Mr. C. J. Tompkins on a motor trip west.

Mr. Huston came to this district upwards of twenty years ago, taking up teaching at Frank in 1906. About five years later he relinquished his post at Frank, preferring for a while to take up less laborious duties in a rural school, and engaged to teach at Gillingham, four miles north of Lundbreck. Later he moved to Maycroft school, further north of Lundbreck, where he taught till retiring from the profession in 1917. In 1918 he took up the position of storekeeper with the West Canadian Collieries, Limited, here, and has since held down that post.

Mr. Huston was highly respected as a citizen and was an ardent supporter of anything that tended to the welfare of the community and its citizens. He was an active member of both the Masonic and Elk orders and also a member of the vestry of the local Anglican church. His place with these institutions will be very difficult to fill.

Mr. Huston was a charter member of Blairmore Lodge, B.P.O.E., and out of respect for him, the vacant chair of chaplain has been draped and at the regular meeting on Tuesday night, the lodge resolved itself into two minutes of silence with bowed heads.

About two years ago, Mr. Huston, while driving with his sister, Mrs. (Hon.) Edward Brown, in British Columbia, had a very narrow escape from death when their car was hit by a C.P.R. train at a railway crossing.

Crowview Rebekah Lodge is celebrating the seventy-sixth anniversary of the founding of the Rebekah degree in the Lodge hall tonight. All Oddfellows and Rebekahs are invited.

ma McDonald, of Bellevue.

The committee in charge of local arrangements were made up as follows: Chairman, Mr. Moses Johnson, district inspector of mines; Mr. Noble McDonald, superintendent of Bellevue mine of the West Canadian Collieries, Limited; Mr. William Stevenson, general manager of Hillcrest Collieries, Limited, Hillcrest; Mr. Frank J. Smith, secretary-treasurer of Hillcrest Collieries, Limited; Mr. G. A. Vissac, general manager of the West Canadian Collieries, Limited, Blairmore and Bellevue; Mr. Raoul Green, general superintendent of the West Canadian Collieries, Limited; Mr. George Kellogg, general manager of the McGillivray Creek Coal & Coke Company, Limited, Coleman; Mr. O. E. S. Whiteside, general manager of the International Coal & Coke Company, Limited, Coleman, and Mr. J. A. McLeod, superintendent of the International Coal & Coke Company.

The party, entrained at 11 p.m. for Kimberley, where they were to join the "Red Special" party and spend the greater part of Saturday around the silver-lead mines of that district.

## ORDER EASTERN STAR

Vimy Chapter, Order of The Eastern Star, are holding a Tea and Sale of Home Cooking and Handkerchiefs at the home of Mrs. F. M. Pinkney on Saturday next, September 17th, from 3 to 6 p.m. Everybody welcome, so come along and bring your friends.

## ST. LUKE'S CHURCH, BLAIRMORE (ANGLICAN)

Services Sunday, September 18, as follows:

Sunday school meets at 10 a.m. Morning Service at 11. This service will be a Memorial Service for the late Mr. W. I. Huston, a member of the vestry and good supporter of St. Luke's.

A. D. CURRIE, Incumbent.

Under the supervision of Rev. Father Donovan, of Bellevue, a Catholic church is being erected at Barons.

## COWLEY SCHOOL FAIR

Cowley's annual school fair will be held this year on Friday, September 16th, commencing on the recreation grounds at 2 p.m. The programme will include sports, exhibits, dancing, elocution, etc.

The display of exhibits this year promises to be large and interesting, and will be arranged at the Tustian hall, where also the elocution and public speaking contests will be held. The exhibition opens at 3 p.m., the elocution at 7.50 p.m., to be followed by dancing at 9.30. An excellent food and good music are promised. Free tea and coffee will be served from 12 to 1.30 p.m. in the United church for visitors bringing their own lunch. The Ladies Aid will also serve tea, sandwiches and cake in the Masonic hall from 2 to 6 p.m.

Apparently the balloon trousers didn't come to stay.

**For your boy at school—  
A Gruen Watch, moderately priced**

Think of your boy's pride and pleasure in owning a real Gruen Watch—a symbol of his coming manhood—a source of constant admiration from his companions! We have Gruen Semi-Thins priced as low as \$35; Semi-Thin Juniors, \$30 and \$40. Others up to \$75. Let us help you select.

WORLD HAPPENINGS  
BRIEFLY TOLD

Seeing New York by air is cheaper than by taxi. The same route covered by an airplane at a cost of \$5 will run up a taxi bill of \$6.10.

Wayne B. Wheeler, former counsel of the anti-subversive house of America, died at Little Rock sanitarium recently, due to a heart attack.

Immigration to Canada for the month of July, 1937, totaled 12,388, made up of 5,432 from the British Isles, 2,101 from the United States and 5,155 from other countries.

Ernest Vierkötter, who won the Canadian National Exhibition marathon swim in 1936, is now planning a vaudeville tour, after which he will likely enter military pictures.

The purchase of 16 quarter sections of land, involving \$56,325, was the result of the visit of a party of land-seekers from Nebraska and Kansas to the Eaton, Tyner Valley and Snipe Lake districts in Saskatchewan recently.

Communal rioting at Nagpur, capital of the central provinces, British India, resulting in the death of 15 persons, is reported by the Bombay correspondent of The Exchange Telegraph. Many families are leaving the city, fearing renewal of the troubles.

Commander Richard E. Byrd states that he has planned to leave New York next August for the South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

The Aero Club Committee, after hearing Ben Callizo, French aviator, who recently claimed to have made an ascent of 13,000 metres (42,651 feet), decided unanimously not to register his record of August 23, and to disqualify Callizo for life.

M. Driand, foreign minister, acting as president of the allied conference of ambassadors, has formally notified M. Stresemann, German, that the allied army of occupation in the Rhineland will be reduced from 70,000 to 60,000 men. Details of the reductions will be announced later.

The death occurred at Montreal after a long illness of Samuel L. Kydd, late editor of The Montreal Gazette. Mr. Kydd joined the staff of the paper in 1874 as a compositor and before being promoted to the position of editor, filled almost every kind of office in the newspaper. He retired from the editor's post last year owing to failing health.

## Fatal Automobile

## Accidents in Canada

Over Six Hundred Persons Were Killed During 1936

The Dominion Bureau of Statistics issued a special report on deaths from automobile accidents in the nine Provinces of Canada during the year 1936. Under this title are included the accidents in which automobiles are involved in collision with other vehicles, and in collisions with drawn vehicles, street cars and trains.

In the nine provinces of Canada deaths from automobile accidents totaled 606 for the year 1936, made up as follows: Prince Edward Island, 1; Nova Scotia, 28; New Brunswick, 11; Quebec, 183; Ontario, 242; Manitoba, 27; Saskatchewan, 21; Alberta, 83; and British Columbia, 60. For the whole country the death rate from this cause was 6.5 per 100,000 of population, the individual provinces giving the following rates: Prince Edward Island, 1.1; Nova Scotia, 1.2; New Brunswick, 2.7; Quebec, 7.1; Ontario, 7.7; Manitoba, 4.2; Saskatchewan, 2.6; Alberta, 5.4; and British Columbia, 10.6.

In the nine provinces 415 of the deaths due to automobile accidents, or 73 per cent. of the total, were males; deaths of females numbered 161, or 27 per cent. of the total. Children under 15 years of age contributed 186 deaths, or 31 per cent. of the total. In this age group there were 123 male and 63 female deaths, a proportion of 66 to 34 in the mortality of the two sexes.

## Supports Bay Route

Entire support for the opening of the Hudson Bay route is given by the St. John Telegraph-Journal, one of the most influential newspapers of the Maritime provinces. "In fairness to the west," it says, "it is not to discredit the Bay route should cease. The plan is going through. It should be expedited. Let us hope that the results will fully meet the expectations of Manitoba and Saskatchewan. They have made a resolute fight for what they believed to be their due, and the rest of the country should wish them all good luck."

A fool and his father's money are easily separated.

W. N. W. 1938

## New Wireless Stations

Prospect of Improving Communication Between England and the Dominions

In addition to the beam wireless stations between England and the United States, which are almost ready to begin operations, new stations are being built for service between England and South Africa, and between Canada and Australia. The erection of the Indian beam stations completes the contract of the Marconi Company for wireless telegraph communication for the British Government, but by no means completes the immediate prospect of improving communication between England and the Dominions. Marconi officials say the experiments have proved the possibility of carrying on a wireless telephone conversation by means of the beam station simultaneously with the operation of high speed wireless telegraph service. They declare it will be possible before the end of next year for telephone subscribers in England to call up subscribers in any of the Dominions.

## Canada's Mineral Resources

Sir Robert Morris Says Dominion Offers Great Field For Development

Sir Robert Morris, who has returned to England from Canada, where he attended the Mining and Metallurgical Congress of the British Empire, spoke with confidence of the future of the Dominion, especially in relation to her vast mineral resources. He said it was fitting that the metallurgical conference should meet in Canada because the mineral resources of Canada offered the greatest prospect of lucrative development of any in the world.

He continued: "They have only just scratched the mining areas of the Dominion up to now. There is a wave of enthusiasm for prospecting minerals in Canada which can be witnessed nowhere else."

## Make Glue From Fish Scales

Fish glue prepared from scales by natives of the Congo region in Africa, is used for waterproofing their clothes as well as canoes. Popular Mechanics magazine says. The natives prepare the glue by mixing the scales of fish with twigs of various plants and boiling the mixture. The material to be waterproofed is then dipped in this glue and allowed to dry.

## A New Trick For School Or Playtime

Smartly simple is this chic frock having a two-piece shirt shirred to the bodice. In View A the high neck is finished with a round collar and the long sleeves are gathered to narrow wristbands, while in View B contrasting material is used for the patch pockets, overlying on the square neck, and cuffs finishing the short sleeves. No. 1642 is in sizes 4, 6, 8 and 10 years. Size 6 requires 1 1/2 yards 36-inch, or 3 1/2 yards 54-inch material, and 1/2 yard additional 26-inch contrasting for View B. Price 20 cents the pattern.

## Goes To Argentina

W. J. JACKMAN

W. J. Jackman, of Clover Bar, Alberta, is now on his way to Buenos Ayres, Argentina, where he will make his headquarters as representative of the Canadian Wheat Pool for South America. Mr. Jackman has been on the board of directors for the Alberta Wheat Pool since the formation of that organization. He has resided in Alberta for over 22 years, coming in 1905 from the old country to farm. During his residence in Alberta he has always taken an active interest in farmers' organizations. His intimate knowledge of pool operations, his organizing and business ability and his knowledge of the Spanish language equip Mr. Jackman to be a splendid representative of the Canadian Wheat Pool in South America.

## Heat Stored Underground

Man Should Bore Holes In Earth To Obtain Heat Supply

Man should bore holes to get heat from the interior of the earth instead of destroying a highly elaborate substance like coal, the British Association of Science was told by J. L. Hodgson, mechanical engineer.

He declared that heat stored in great spheres inside the earth is at least 30,000,000 times that available in the world's coal reserves. Hot rocks are found, he said, only about 33 miles below the surface and much nearer in volcanic areas.

The speaker said he advocated drilling shafts five miles apart. Workers boring the holes would be protected by heat proof suits, including liquid air containers to supply cool dry air. The lecturer estimated that a cubic mile of hot rock would yield as much heat as burning 200,000,000 tons of coal.

"I only wish," said the teacher, exasperated by the naughtiness of one of her small pupils, "that I could be your mother for a week."

"All right," replied the youngster, coolly, "I'll speak to father about it."

Teacher (during history lesson): "What are the races that have dominated England since the invasion of the Romans?"

Small Boy: "The Dorby and the Grand National, mias."

Diamonds can be identified by means of ultra-violet rays, under which the stones give off various colors which can be photographed.

"Oh, George, I've been stung by a bee. What shall I do?"

"Put some ammonia on it."

"But it has flown away."—Titi-Hits.

## Supplies Germs For Experimental Purpose

Work At Lister Institute In London Is Interesting

There is always a steady demand, from laboratories and hospitals in all parts of the world, for germs—of every known description and variety, for experimental purposes.

Because of this, there is maintained at the Lister Institute, London, what is known as the National Collection of Type Cultures. Here a large and expert staff is kept busy feeding, raising and bottling bacteria.

When called there regularly—writes a London journalist in *Pearson's Weekly*—I found everyone bent intently over his delicate work. In cabinets along the walls were drawers upon drawers of tubes, all carefully tabbed and labelled, and sealed with wax of cotton wool.

The desks were fitted with Bunsen burners, stills, incubators and much other complicated apparatus, while in the centre, directing operations, stood the curator, Dr. R. St. John-Brooke. Gradually, I was assailed by an uncanny feeling, as I realized that I was literally surrounded by millions of deadliest germs! And, a little later, I felt positively uneasy when Dr. Brooke held a tube under my nose and murmured nonchalantly: "Plague!"

Despite the coolness with which the experts handle the tubes of germs, however, they are by no means immune from infection; and I heard there is hardly a member of the staff who at some time or other has not had a serious bout of illness as a result of his fine work.

Some of the bacteria are "cranky" borders, and for their special convenience a remarkable sort of kitchen is maintained.

The food is slightly different in many cases, and it is necessary to suit particular tastes. There is one variety of germ which is partial to nothing but beef tea, while others in the assembly turn part of their food into alcohol.

One sort lives in curdled milk, another alters the temperature of our blood—lest it should catch cold and die—while others cannot stand the air.

When, therefore, you remember that here are kept well over two thousand different sorts of bacteria, you can understand the vast amount of study and work that is involved. New varieties are continually being discovered and sent from all parts of the world to be added to the collection.

Not only are the organisms associated with diseases kept in stock, however. There are also tubes containing the little chips carefully preserved from cheese, yeast and beer.

Other varieties associated with veterinary complaints are there too, besides those responsible for the damage to plant life. The collection is therefore at the disposal of students in widely varied spheres.

All the different strains are carefully listed in a catalogue, and millions of germs may be bought for a shilling! But it is necessary to explain to the buyer just what "medium" the organism is preserved in, and because of this a careful labelling system is used. Even the tubes of the cotton wool plugs has a certain significance.

## Texas Has Rubber Tree

The only rubber tree in Texas is said to have been discovered on premises in Orange. The owner started to cut it down, but observed that it was of unusual type, and as a result some inquiries were made among the neighbors, who recalled the fact that a late owner of the place set out the rubber tree plant many years ago. The tree at the present time is a foot in diameter and in a thriving condition.

## BRITISH SCHOOL BOYS VISIT CANADA

A party of British public school boys arrived in Canada on Saturday on the White Star liner *Albion* to make a tour of Montreal, Ottawa, Toronto, Algonquin Park and New York, to become better acquainted with Canadian boys and to understand the points of view of other nations by means of personal friendship. They are in charge of Rev. E. S. Fallowell-Farrow, M.A., F.R.G.S., of Cambridge University, third from the left in the front row, and Rev. Howard J. Rose, M.A., of Oxford University, on the extreme right.

## SUNDAY SCHOOL LESSON

SEPTEMBER 13  
THE KINGDOM DIVIDED

Golden Text: "Pride goeth before destruction, and a haughty spirit before a fall."—Proverbs 16:18.

Lesson: 1 Kings 12:1-24.  
Devotional Reading: Proverbs 1:20-25.

## Explanations and Comments

1. The Request of the People, verses 1-5. Rehoboam, Solomon's successor, went to Shechem and there the people, through Jeroboam the son of Nebat asked for a reduction of their burdens. "They rather made our yoke grievous," they said. "The yoke" was an emblem of servitude; compare Jesus's words in Matthew 11:30. The people had been heavily taxed by Solomon, and forced labor had been required. Recall Samuel's prophecy when the people demanded a king, 1 Samuel 8:10-18, and read 1 Kings 4:7, 22-28; 5:1-18, to see how Solomon's extravagant court and his immense buildings must have imperilled the people. "Now therefore make the yoke of your servants lighter," Rehoboam said. "I will not add to your yoke, but I will ease it." Rehoboam's first mistake was in waiting for the advice of any one. His own heart should have told him that the request of the people was just and right, and that he should have answered at once, "I will make your yoke lighter."

2. The King's Good—Counselors, verses 6-7. "What shall I answer?" Jeroboam asked of the men of experience, the elders of the people. "If you will yield to the people's will for the present," they replied, "and will do their will, and speak well to them, then they will be your servants for ever." They seem to counsel fair promises rather than actually fair dealing, yet they certainly advocated conciliatory measures.

3. That is the best government which desires to make the people happy, and knows how to make them happy."—Maccabey.

## Invade Railroad Field

Number of Women Employees Is Rapidly Increasing

The rapid advance that women have made numerically into railroad-railroad during the past seven years is demonstrated in figures published in the *Central Magazine*. It reports that in the period under review the number of women employed on Class 1 steam railroads has increased more than 50 per cent. They now constitute one-thirtieth of the total staff. Their number in 1926 is given as 61,295.

Women were employed in almost every branch of railroad service last year, including two in train operation and 290 in shopwork, but the most numerous was naturally that engaged in clerical and semi-clerical occupations, accounting for 51,127, the magazine reports. The next largest class in 1926 was that employed in cleaning, namely, 5,332; others, large figures being "personal service" (waitresses, laundresses, etc.), 1,814, and telegraph and telephone operators, 1,427.

June Husband—"This steak tastes queer."

June Bride—"I can't understand it. I know I burned it a little, but I rubbed some vasoline on it right away."

Deaf worshippers in a Fulham church are now supplied with earphones so that they can hear and join in the service by means of a microphone.

Musician—"Do you have a piano forte?"

Mr. Dammie—"Yes. Forte dollars down and ten a month."

Canadian wheat is necessary to make palatable bread; Russian or Australian flour is not satisfactory.

When misfortune reaches a man's door she walks right in without knocking.

The only two places that contain everything are the world and a drug store.

Physician: "Take a deep breath and say four."

Able: "Three-hundred-eight."

Most men are willing to start something for the sake of an argument.

"It's the man with the smile that wins."

"Sure. That's why he smiles."

One way to keep your credit good is to pay your debts promptly.

One good excuse is better than a thousand poor ones.

## New Narcotic Gas

Brings Deep Sleep and Has No After Effects

At the last meeting of the Medical Society in Berlin, Professor Unger described his experience with the new narcotic gas technically known as E. 107. Up to the present it has been customary to use either ether or chloroform to produce unconsciousness in surgical cases. Gases recently introduced another means, a pure gas acetylene, but for various reasons its use has not become general.

It was not any danger connected with the use of ether or chloroform that induced the attempt to produce E. 107, but the discomfort connected with their use. Many sick people are unpleasantly affected by ether or chloroform; the feel of the mask, the choking sensation, the knowledge that they are being put to sleep by force, combine to make them nervous. On awakening they are plagued with thirst.

E. 107 does not have to be breathed in. It is applied by means of a syringe and works from the intestines. In eight to fifteen minutes the patient falls into a natural sleep, lasting for several hours, and feels no after effects on awakening. It is a sleep of unconsciousness during which no pain can be felt and muscles are relaxed. The drug has no effect upon the heart, but sometimes affects the breathing.

Other physicians related their experiences to the society. About a thousand cases of operations with E. 107 were reported, but the medical profession does not consider it possible to form a definite opinion as to the value of the drug until far more evidence had been collected. For the present the use of E. 107 therefore has been confined to a few great surgical stations for continued experiments.

## Advertising Helps Credit

Merchant Who Is Consistent Advertiser Can Usually Get Loan

There is one way by which a business man's credit can be improved and that is by a policy of consistent advertising. Bank men believe in advertising; they know it pays. Their feeling, therefore, is that a merchant who is a good advertiser applies for a loan, that a reasonable amount of goods bought by him on credit is likely to be turned over quickly and promptly paid for, on account of his methods of keeping his goods constantly before the public. Discriminating buyers of every class know that they can get fresh goods from the store that advertises. The merchant who advertises seldom has slow-moving goods. And in that way advertising helps the merchant's credit not only with the banks, but with his customers. And one is just as important as the other.

## Naval Men Excluded From Active Politics

Cannot Make Any Speeches Or Serve On Committees

Naval men will be virtually excluded from active politics by a new order issued by the Admiralty.

The order forbids any naval officer or man to make an address to electors or in any manner allow himself to become a candidate for Parliament. The prohibition applies also to the Parliament of Northern Ireland, the Free State and the Irish Parliament, and forbids speaking or appearing on the platform at political meetings or serving on election committees.

It is provided that naval officers must seek permission from naval authorities if they wish to enter the political field.

Sam—"Yes, sar. You got the greatest, best-natured man for a husband, Liz."

Liza—"Go on. They's only one way to call it—insanity."

Wife—John, dear, when I go to Palm Beach I shall dream of you every night.

Hub—14 rather you stayed here and dreamed of Palm Beach.

Whyoning is attempting to round up the thousands of wild horses in the state.

Tilly: "Don't you dare wear be for fear."

Billy: "Pardon me, go ahead."

A woman runs almost as fast when she sees a mouse as a man does when he hears a baby crying.

The quantity of meat consumed in Great Britain last year was 1,600 tons per week greater than in 1925.

The more lawn some people have to mow the more they borrow the mower.

## CHAPTER VII.—Continued

The magistrate proceeded to give judgment. "Stand up," he commanded again.

Helen stood.

"You see," she understands—I thought she did."

Addressing Helen he said, "You could have cleared yourself perhaps of one charge, but not of the other. So I have no option but to send you to jail. You shall be confined for three months at Stony Mountain."

Miss Rodgers was on her feet. "I appeal the case," she said.

The court room began to empty. Only the regulars held their seats. The transients were going. Some of the women would go back to attack the dishes they left in the sink; others went to inspect the shop windows; two of them strolled leisurely down to the White Lunch to have a cup of coffee and a piece of pie. It was near lunch time when Mrs. Morris remarked to her friend Mrs. Edgar, "When a woman has only herself to cook for, she never cares when or what she eats."

"They discussed the case as they sat at the marble topped table."

"That girl was innocent," said Mrs. Morris, "but foolish. I'll bet she's shielding a man."

"Oh, I don't know," remarked her friend, "I remember when I was her age I had an awful crush on a woman about ten years older than I was. I forgot her name now, but she was my goddess for the time. There was something fine in that girl's face—something noble. It seems a pity to send her to jail, where she will have to see and hear everything that's vile and ugly. The whole thing is rotten."

"Well," said the other one, "why don't we try to do something?"

"What's the use?" Mrs. Edgar was breaking her ribs with her fork. "Women never hold together. That's why people like Magistrate Windsor can insult the women's organizations and get away with it. The women's clubs are trying to make things better, and they get blamed for what goes wrong. You and I do nothing and therefore are never blamed for anything. Great system!"

"Well, some of the women in the clubs are funny," said Mrs. Morris. "I saw one of them the other day getting her money out of a pocket in her petticoat. She's one of their big spouters, too. Why don't they keep up with the times, visit beauty parlors and learn the use of cut-throat razors?"

"Neither woman considered a man's petticoat," she said, "when you come to think of it. She was lucky

to have money anywhere. And life abounds in odd signs. I saw one of our foremost citizens trying to unlock the door of her suite with a button last night. So long as we are not doing anything to make things better we should not be critical. You won't forget this afternoon—don't be late—I'm just having four tables."

## CHAPTER VIII.

The Girls' Friendly Home stands on a hill overlooking the city, a great bare, white building with glittering windows, which in the rays of the setting sun burn like the bush that Moses saw, yet like the bush are not consumed.

It seemed to be ever looking down at its many eyes on the struggling people below, watching them with kindly glances, ever beckoning to those who are sore beset in the struggle to come up and find safety. Indeed, some such conception was in the minds of those who built it, and in the dedication services many an eloquent speaker told of the seething, pillaged city, with its pitfalls and temptations, and related that here on this quiet hill-top the people of God had made an island of safety where the young things caught in life's cruel tangle could find sanctuary.

There were numerous references in the dedication speeches to the lost lambs of the flock, pierced by many a thorn; the white, fly-bruised and broken and crushed in the dust of life, the lost pieces of silver which caused such a household upheaval. The speeches were made by the ministers of the city, who in large proportion made up the Board; the other members being of that type of middle-aged portly gentlemen, who are usually allied to as "solid business men."

The Board had its troubles, and sometimes even contemplated adding women to its numbers. Some of the ministers made that suggestion speaking enthusiastically of the excellent help they received from Ladies' Aid and other societies for their churches. As a rule the solid business men opposed the proposal. It was felt that the presence of women might prove embarrassing. There were certain matters which were best discussed by men alone—besides, there was always a danger of women being too emotional. There was an auxiliary Board, composed entirely of women, who held bazaars, teas, chicken suppers, made towels and sheets, looked after the girls' clothing, solicited donations and in general did all those little unimportant, yet necessary things which women do so well. It was felt by the majority of the Board that the women had their part, and it would be better not to confuse the issue.

The first difficulty the Board experienced was with a Matron—rather a young person who was for such an important position, scarcely forty, who had come highly recommended from one of the Western States. She had many relatives in the city, and it was felt that her appointment might interest some more of the solid business men in the home, for her relatives were of that type.

She began by making some sort of a merit system in the Home, which was rather alarming. She unlocked the doors, insisted that the girls lay aside the mud-colored uniforms which the Board had decreed should be worn, and actually took the girls out with her in turn to the movies and to concerts and lectures. She also had her friends come with their cars every week to take the girls for drives. She planned picnics, corn-roads, excursions, and indeed made the Home such a happy place that not one of the girls attempted to escape, although they had every opportunity to do so.

The Board looked on calmly disapproving, yet helpless. But the matter came to a crisis at a meeting where the Matron was present by request. One of the members (and one of the most solid, too) began by pointing out that there should be some differences in the way well-behaved girls and fallen girls are treated. Here the

Matron interrupted to ask him to retract the word "fallen." She gave the Board members positive faith by the things she said about the double standard of morals which was made by men to shield men and went on to tell them that many of the girls were innocent young things from the country who had come to work in the city to help the family at home, and had fallen victims to men's lust and hypocrisy. The very men who led them astray, fathers of families some of them, and regarded as respectable men in society, no doubt now spoke of these girls as "fallen women."

It was most embarrassing. She hinted that there should be women on the Board, and questioned the ability of men to quite understand the problems of rescue work.

Anyone can see from this what sort of woman the Matron was and why the Board dismissed her. The girls had loved her and had done their best to carry out all her wishes. They had scrubbed and washed and polished the Home until it sparkled; they had planted a garden and made flower beds; they had sewed and crocheted and embroidered; they had studied, sung, prayed, and bravely tried to live a useful happy life. The day she left the scenes were disgraceful—not a girl sat a mouthful—they just sat and cried. The Board could see they had done well to get rid of her; she was having such a weakening effect on the girls.

The Board decided then and there to have a man for the head assisted by a woman of course. "There must needs be a woman," said the good old Dr. Smythe, "for appearance sake at least." So, after diligent care, Mr. and Mrs. Wymouth were found somewhere in the East where they were doing evangelistic work. Their letters of recommendation abounded in such terms as "earnest co-operation," "moral character," "deep sincerity," "unfailing devotion," "passion for souls," etc. The Board was pleased with their joint and several appearance.

(To Be Continued.)

## Socialists Opposed To Capital Punishment

Bill To Be Introduced When French Parliament Convenes

Agitation in France in favor of Sacco and Vanzetti, has provoked a campaign in certain liberal sections of the press in favor of the abolition of the death penalty as advocated by Pierre Renaudel, Socialist leader and member of the Chamber of Deputies, who has announced that as soon as Parliament convenes for the fall session he will introduce a bill to eliminate the guillotine and all other forms of capital punishment.

A life sentence would be substituted for the death penalty. Discussing the projected measure, M. Renaudel said:

"The Sacco-Vanzetti case, although it had no connection whatsoever with France, demonstrated once more the horror which the death penalty provokes among civilized peoples, especially when justice seems in question and when the partiality of judges appears to supersede the absolute facts. Our own nation for twenty years has been faced with the possibility of an innocent man having been put to death. Civilized nations have no right to run such a terrible risk. We Socialists therefore demand that Parliament abolish the death penalty."

## Teaches Glass Blowing

The University of Pennsylvania is the only large school in the United States which offers a course in glass blowing. The Professor is Frederick Wagner, one of the few glass blowers left in Pittsburgh. He has four students.

The discovery that the fiber of the cocoon spun by the silkworm could be made into cloth is ascribed to Se-Ling-She, a Chinese queen who lived about forty-seven centuries ago.

Some modeling is so disagreeable that one can't even forget to take it.

Some men's natural bent seems to be patterned after a corkscrew.

A good man isn't necessarily a desirable neighbor.

Experiments of more than thirty years have proven that Aluminum is the best container for tea. Red Rose Tea is now packed only in Aluminum, and every package is guaranteed to be in perfect condition.

## Lates Idea In Novelty Revue

A Novel Idea Is Put Across At The Calgary Exhibition

American producers of theatrical revues looking for new ideas for fairs and exhibitions may profit by an original novelty recently offered at the Calgary Exhibition and Stampede. The feature of the evening program in front of the grandstand was listed as a "Grand Novelty Revue." At the first performance the audience expected to see a boy of pretty girls on the stage when the curtain went up for the "Grand Novelty Revue." Instead they saw some of the aristocrats of the live stock world of Western Canada. Then followed a series of scenes illustrating the progress of agriculture in the Canadian West from the time of the passing of the herds of buffalo down to the present time. The pure bred stock took part in the revue seemed to be conscious that they were expected to "do their stuff" well and they did it. The scene was staged with elaborate scenic and lighting effects and was a popular success from the start. During the week the exhibition was the venue of great capacity audiences and throughout the week a record attendance was registered at the "dressing rooms" of the principal actors and actresses. The revue showed that the fame of Western Canada was not confined to the fact that it is one of the world's principal wheat producing areas, but is an important producer of every kind of live stock.

## Another British Aviator Killed

Young Officer Was Fourteenth Victim

Fatal casualties in the Royal Air Force this year rose to forty when Pilot Officer Harold C. Kelly, twenty-three years old, died in a hospital after his single-engine biplane, which was caught in a tail spin, had fallen at the Avon Whittaire airfield.

Stryczynski was administered to the flyer as axes and wire-cutters were used to extricate him from the wreckage of the machine, which, in getting into a tail spin, at 400 feet, had crashed three times and then crashed into a nose dive.

Kelly was still alive when lifted from the cockpit, but died shortly after he was introduced to the hospital. He had been in a similar accident two years ago, both arms and one leg being broken, but he was understood and continued his flying exercises in view of qualifying for a flying officer's certificate. It was the first fatal accident associated with this airfield in six weeks.

Sore Feet Before It—There are many who have been afflicted with sore feet and have driven them bad with Dr. Thomas' Electric Oil. All slightly troubled should apply this oil immediately. It is the best remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

## Would Avert Oil Famine

Scientist Discovers Process To Get More From Wells

An impetuous government scientist has developed a process which will permit nearly 100 per cent. of the oil supply to be taken from oil wells, only 15 per cent. which is the present average.

P. G. Nutting discovered that by the simple use of washing-soda this elusive 85 per cent of hidden oil could be dissolved and extracted from the sand.

Laboratory tests were 100 per cent. perfect, but in actual field operation the results may not be so great. Oil experts say if it goes 40 per cent. it will stave off for a considerable time the anticipated oil famine which is expected to develop at the end of six years.

Employment Agency Manager—So you'd like to employ a man. What kind do you want?

Hi—I'd like to have one of them Free Masons I've heard so much about.

The big brigade of a European village dashed into the village inn and the chief fireman said:

"Beer and sandwiches all around, please, and hustle up the order. We've not got any too much time. We're on our way to a big fire."

Tablets found in ancient Babylonia and Assyria show that banking transactions were carried on 5,000 years ago. Cheques and notes were made of clay, which were then baked.

Drives away pain—Minard's Liniment.

## Will Return War Relics

U.S. Colonel Has Large Collection Of German and Austrian Souvenirs

A man of 52, whose different manner and youthful face belie his age and his attainments, sailed from New York recently, en route to Hamburg, Germany. With him a small wooden box and a large packing case.

The man, who is Lieut.-Col. George Crouse Cook, R.C. U.S.A., possessor of a Conspicuous Service Cross for work during the World War, will, if asked, refer to the contents of the wooden box and the packing case as "junk," but he has cherished that junk enough to have catalogued every item of its 500 component parts.

Specifically, the small box contains such things as caps, cigarettes, citations, pay books, iron Crosses, wound medals, etc. all belonging to German or Austrian troops who fought the Allies, and picked up by Col. Cook during service in France. The packing case is filled with Zippoite parts, pieces of shell, helmets and larger trophies.

Col. Cook, for example, will try to find Alfred Merten, of Götting, Saxony. For in the small wooden box is an infantry cap and a shoulder strap which were taken from Merten by the French at Blanches in Artois, July 9, 1916. Col. Cook wants to restore the cap and strap and learn Merten's version of the war.

Another item Col. Cook wants to give back is a wound decoration, a stamped medal, finished in silver, that was bestowed upon Vladislav Jagla of the Fifth Company, 463rd Prussian Infantry, for being wounded four times at the front. Jagla was captured on September 30, 1918, at Montigny.

## Little Helps For This Week

Ye are all the children of light and the children of the day.—1 Thess. v. 5.

If one looks upon the bright side, it is sure to be the right side. At least that's how I've found it as I've journeyed through each day. And it's queer how shadows vanish, and years of your youth pass, and from a bright side sort of way, every day is a new day.

—Mary D. Irvine

There are souls in the world who have the gift of finding joy everywhere, and leaving it behind them when they go. Their influence is an inevitable gladdening of the heart. They give light without meaning to shine. Their bright hearts have a great work to do for God.

—Frederick W. Faber.

The habit of looking at the best side of any event is worth far more than a thousand pounds a year.

—Samuel Johnson.

Corns are painful growths. Holloway's Corn Remover will remove them.

Auntie—"Do you ever play with bad little boys, Willie?"

Willie—"Yes, Auntie."

Auntie—"I'm surprised. Why don't you play with good little boys?"

Willie—"Their mothers won't let me."

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

If, after years of toil, a man wins success some day is sure to come along and tell him how he might have won it in half the time.

Minard's Liniment relieves backache.

"It's never too late to say aye," said the red-headed girl.

"Yes, it is," said the bald-headed man.

Men sometimes become wiser as they grow older, but they seldom become less foolish.

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monrovia, California. Aspirin is a Bayer product. To avoid confusion, the Bayer Manufacturing Company will stamp their general trade mark, the "Bayer Cross,"

## Mothers, Your Health Must Be Up to Par

London, Ont.—"During one of my

expectant periods I was so weak and nervous I could not get around my head, I felt heavy all the time and suffered with sick stomach. I was advised to take Dr. Pierce's Favorite Prescription, and after I began taking it I got along fine. It relieved me of all the bad effects, made me well and strong, my nerves were good, and I kept to well. I could do all my own work and I had a fine healthy baby."

"I also find that Dr. Pierce's Pleasant Pellets keep the stomach, liver and bowels in perfect working order and never cause distress."—Mrs. James Campbell, 109 Indiana St. (picture above). All druggists.

Send 10c to Dr. Pierce's Laboratory in Bridgeport, Ont., if you desire a trial pkg. Favorite Prescription tablets or Pleasant Pellets.

Betty: Have you a green lipstick? Shop Assistant: Green lipstick?

Betty: Yes, a railway guard is taking me out tonight.

THE TONIC THAT GIVES STRENGTH

After Acute Diseases the Blood Must Be Built Up Before Recovery Is Complete

Fevers and other acute diseases like pneumonia and influenza, leave the patient weak, with his blood and unstrung nerves. The period of convalescence is often long and trying, and years of poor health have frequently followed so brief an illness as an attack of influenza or pneumonia.

Much of this period of misery could be avoided by taking steps to build up the blood so that it can carry to the nerves and other tissues of the body the elements they need to restore their normal functional activities. To build up the blood and restore it to its rich, health-giving vigor, no other medicine can equal Dr. Williams' Pink Pills. From first to last it is their mission to improve the blood and thus restore good health and vigor.

The value of these pills in conditions described above is shown by the statement of Mrs. Rebecca O'Brien, Pembroke, Ont., who says:—"In Nov., 1923, I was stricken with pneumonia, and at the time but little hope was held out for my recovery. However, with the best of care I was able to walk about after some months. But I did not recover my strength. The doctor told me I was anemic. My appetite was poor, I grew nervous and restless. I was deathly pale and practically gave up hope of ever being strong again. However, remembering that in my girlhood I had taken Dr. Williams' Pink Pills with decided success, I decided to try them again. By the time I had used two boxes there was no doubt the pills were helping me. I continued to use I was soon able to attend to my household duties. I continued taking the pills, however, until I had had twelve boxes, by which time I was enjoying better health than at any time in the previous ten years. I don't know for what the pills have done for me, I give this statement in the hope that it may point the way to health to some other weak, despondent woman."

You can get these pills from any druggist, or write to Dr. J. C. Williams, a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Men sometimes become wiser as they grow older, but they seldom become less foolish.

## OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in hospital I returned home as weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I suffered no more help for me. I had severe pains in my left side and suffered agony every moment. One day my mother begged me to try your medicine. My husband gave me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife and my husband can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound. Two bottles of Lydia E. Pinkham's Medicine, and have also used the Sarsaparilla Wash."—Mrs. L. LAJENESS, Box 106, Coniston, Ontario.

## A SPLENDID MOTTO

Aim high in every thought and deed and ever strive to do your best, it lifts the mind to higher planes and gives to life an added zest. It is the things we plan and do—the products of the hand and brain—that mark the current of our lives, and bring a touch of joy or pain. Around each struggle that we wage the breath of victory ever clings, and we can make each simple task a stepping stone to higher things. To noble aims let us aspire as we fight on with will to win; to make our tasks a brave deed, and take each loss with lifted chin. And when we reach life's eventful years, and labor's tasks are almost done, we'll find our greatest comforts come from work that's well and truly done.—B.L.L.L.

## CANADIAN MINING ACTIVITY

There is much concern in some industrial countries over an apparent lack of reserve sources of raw material, particularly mineral resources. The demand is sometimes heard at international economic conferences that the natural resources of the world should be more equitably distributed, or at least be made more easily available to the powers that need greater resources. So long as the resources of nations like Canada are being economically administered, however, without discrimination against any genuine investor, it would be difficult to convince the Canadian people that it would be any improvement to transfer the control of Canadian natural resources to an authority outside of the Dominion.

The Dominion minister of mines stated at a recent meeting of the Empire Mining and Metallurgical Congress that Canadian mineral production last year amounted to \$240,000,000 as compared with about \$5,000,000 in the year of Canada's confederation, sixty years ago. Production statistics showed that Canada produced annually more than forty different primary metals and minerals, thus standing first in world production of asbestos, nickel and cobalt, third in gold and silver, fifth in lead and zinc and sixth in copper. With a relative-

ly small population, Canada's record production is surely notable.

Sir Robert Horne, honorary president of the congress, expressed the opinion at the same gathering that Canada is just on the threshold of her mineral discoveries. There is an enormous area of territory unexplored. Observers would be inclined to agree with Sir Robert after travelling across the Dominion. There is a reason to believe that the Hudson Bay Railway, through northern Manitoba, may help to arouse mining enterprise, just as the building of the Transcanadian & Northern Ontario Railway did over twenty years ago. In some of the mining districts of northern Ontario and Quebec, aviation is being used to advantage. It is believed by explorers that mineral resources extend across northern Canada to the Pacific coast. Frigidous deposits of coal are recorded in Alberta. At the same time, the coal mines of Nova Scotia could probably be made to yield more than sufficient fuel for Canada east of the Great Lakes.

The possibility of treating Canadian coal to save more of the by-products for industry is being investigated at present. The Canadian parliament has authorized the government to subsidize coke-producing plants, to convert Canadian coal into more suitable domestic fuel. The department of mines is particularly interested in the process of methods reported from Great Britain, Germany and other countries, whereby oil is being extracted from coal in commercial quantities. There would thus seem to be opportunities for cautious investment in the Canadian mining industry, more especially for conservative development.—Christian Science Monitor, Boston.

TORONTO MAYOR HOPES  
FOR \$7.00 COAL FRIEGET

TORONTO, Sept. 12.—Mayor Foster stated Saturday that in all probability there will be a seven-dollar freight rate for Alberta coal to Ontario. He discussed the matter with Premier Brownlee, of Alberta, here a few days ago. His Worship said that this would enable Alberta coal to be sold in Toronto at \$12 or \$13 per ton.

"I think we are going to succeed. It will be a wonderful thing to save the country \$100,000,000 annually spent in importing coal into Canada," he said.

Householders in this city are at present paying around \$16 a ton for imported anthracite.

The members of Crowview Rebekah Lodge held the opening drive of their fall and winter season whist last night, which was fairly well attended.

## ADVERTISING

All progressive merchants advertise these days, and so do many professional people.

Merchants simply have to advertise to be progressive. They have found that advertising pays.

But some of them would be more progressive if they'd advertise consistently. They advertise when business is good, of course. But they decrease their advertising or eliminate it altogether when business is not so good.

This is just the opposite of what should be the case. The time to advertise more than ever is when business is not so good. That's the way to make it good again—to advertise.

John Wana-maker made millions as a retail merchant. Of newspaper advertising he said: "When the times are hard and people are not buying is the very time that advertising should be heaviest. You want to get the people in to see what you have to sell, and you must advertise to do that. When the times are good they will come largely of their own accord, but I believe in advertising all the time. I never stop advertising."

## REMOVE SIGN BOARDS

A storm of public opinion now brewing may sweep the unsightly bill boards or advertising signs from the roadside of main thoroughfares. Up to this time they have been multiplying in numbers, but there are indications that the public is soon to register a protest that will go far to abolish these eyesores and vision-breakers. Motorists find the posterboard obnoxious for the three reasons that it mars the landscape, obstructs the view of the scenery and creates a traffic hazard by interference with the vision of the driver. All are sufficiently valid reasons why the advertising sign should be prohibited along main highways.

## CUT OUT WORK

Commenting on the adoption of a motion passed at the recent convention of the trades and labor congress held in Edmonton—the motion which sanctioned the principle of a five-day, forty-hour week—the Strathcona Standard says:

Why five days—why not cut out work altogether? Let everybody get a job and just call around on pay day.

"What's the use of spoiling a perfectly good week by working five days?"

"Let all the farmers sell out to Fred White & Co., and each of them drop in every Saturday night before going to the picture show and get their pay check. Lovely, and just as easy as getting blood from a stone."

BLAIRMORE UNITED CHURCH  
Rev. J. W. Smith, Pastor

Serve the Church that the Church may serve you.

MORNING SCHOOL at 11 o'clock. Mr. Smith will give a five-minute talk on the use of the Psalms in the early Christian church. The subject for the Senior Classes will be: "Developing the Native Church."

AFTERNOON SCHOOL at 2. This is promotion Sunday. Let every boy and girl be sure and be present.

EVENING WORSHIP at 7.30. Special "Harvest Home" Service. The church will be suitably decorated with flowers, fruits and vegetables. Appropriate music will be rendered by the Senior Choir. The sermon will be an answer to the man who says "Thankful! Why! Didn't I Work For All I Got?" Even if this is not your attitude, you will find the service inspiring and helpful.

## ANNOUNCEMENTS

Wednesday—"Church Night" at 7.30. Those who were present last night were delighted with the service. The Junior Choir was at their best. Perhaps the sweetest part of the service was the closing item. A mother sat in the centre of the platform, her little child kneeling at her knee, while the choir sang very softly and unaccompanied the child's prayer:

"Jesus, tender Shepherd, hear me;  
Bless Thy little lamb to-night;  
Through the darkness be Thou near me;  
Watch my sleep till morning light."

Next Wednesday Mr. Smith will begin a series of studies of the Lord's Prayer. Come and bring a friend.

Monday, September 19th, at 8 p.m., the ladies are preparing a social evening for the congregation. An illustrated talk will be given by Mr. Smith. The subject will be announced at the Sunday evening worship. The fruits and vegetables will be sold by auction and refreshments served.

We are to have a great treat Sunday and Monday, September 25th and 26th. Miss Theresa M. Siegel, of Calgary, will give rendering of H. Van Dyke's great piece, "The Manions," at the Sunday evening service. On Monday she will give a recital and will be assisted by local artists. Her visit will be one of the great events of the fall programme.

A meeting of all leaders and others interested in Boys' Work will be held in the church tonight at 7.30.

Mrs. Greig, of McLaren's Mill, has kindly placed her home at the disposal of the Ladies' Aid for an afternoon tea on Wednesday next, September 21st, from 3 to 6, to which all are cordially invited. Come and bring your friends.

The Sunday school teachers held their regular monthly meeting on Tuesday evening in the church. It was decided to hold training classes for the teachers during the winter months and these will commence on Friday, September 23rd, at 8 p.m. All teachers and others interested in this line of study are invited to be present.

## HE FOUND THE HOUSE

From London comes a good story according to our way of thinking. It concerns an American actor who had injured his arm. He asked a policeman where he could find a doctor.

"Turn up, Hind-court into Gough Square," said the bobby. "There is a doctor living there on the left hand side. I think his name is Johnson, but I'm not sure."

The actor followed the instructions and found the house. On a plate on the wall was the following inscription: "Dr. Samuel Johnson, author, lived here. Born 1709, died 1784."

The members of Greenhill Temple, Pythian Sisters, will hold their first whist drive for the season on Wednesday next, September 21st, commencing at 8 p.m. The usual six good prizes and good time assured. Mrs. Altermatt's orchestra will furnish music for dancing.

J. BELL, LOCAL AGENT

## DABATOFF DIES OF INJURIES

Nick Dabatoff, who sustained serious injuries when his auto overturned near Parkland early last week, died of his injuries on Friday last. The remains were brought from Claresholm to Lundbreck on Saturday, where interment took place Sunday afternoon. Dabatoff leaves a wife and couple of small children.

A salesman asked a Scottish farmer to buy a bicycle. "They are cheap now, and I can let you have a good one for seven pounds."

"I would rather put the money in another cow," said the farmer, reflecting.

"You would look mighty foolish riding around your farm on a cow, now, wouldn't you?" said the salesman.

"No more foolish than I would be milking a bicycle."

## MONSTER OF THE DEEP CAPTURED

"Some fish" sums up the fish landed at Bedford Basin yesterday afternoon by William McEachern, of Bedford. Six feet long, five feet deep, weighing close on six hundred pounds, the monster of the deep is one of the strangest fish ever landed in local waters.

When Mr. McEachern visited his nets yesterday he noticed they were badly tangled, and on investigation he found what he believed to be either a German submarine gone astray, or the mythical sea serpent of ancient song and fable. It turned out to be neither, but just plain fish, and Mr. McEachern therefore harpooned and towed it ashore.

On land the monster was even more strange and startling than in the water. Commencing with a very

small mouth, such a small mouth it is hard to imagine just how it could ever consume enough to keep up the huge body, it curves sharply to a pair of ears. These floppy parts of its anatomy would do full justice to an elephant and are equally as large.

On the back there is a fin which looks remarkably like that of a shark, while on each side it carries two more fins of a size which would propel any respectable denizen of the briny deep at sixty or so miles an hour. Its tail would make a fine rudder for a small sized sail boat, and from point of view of decoration, is delightfully scalloped in the best fancy work manner, and for utility's sake is as hard as iron.

Just what the fish was or is local Isaac Walton was wondering. Inspector Detective McIsaac ventures the opinion it is an "elephant fish," while Special Officer Buchanan, who is wise in the ways of the finny monsters, is sure it's an overgrown sun fish, while others were quite as positive, like the man who saw the graffe for the first time, "It isn't like anything."

Mr. McEachern, however, was prompt to commercialize his catch and repay the damage done to the nets, for he placed it on exhibition at Lynch's Shows, where a large number of people saw it.

How the fish happened to come into the Basin is puzzling the fishermen, as it undoubtedly a deep sea native, and must have wandered far astray to meet its unhappy end in a fish net on the shores of the Basin.

## DEATH OF D. L. MCCREA

The death of D. L. McCrea, popular druggist of Pincher Creek, occurred at Calgary on Sunday last.

Mr. McCrea, with his family was returning from a holiday trip by motor into northern Alberta. Arriving at Calgary on Wednesday last, he was taken suddenly ill and was removed to the general hospital, where he was found to have a burst appendix and to be in a very serious condition. An operation was performed that afternoon, but he failed to rally and passed away on Sunday afternoon.

The remains were brought to Pincher Creek, where interment took place on Tuesday.

Mr. McCrea was very well known throughout this section of Alberta and was very highly esteemed. He was also well known in musical circles and was an active member of civic and other boards.

Mr. McCrea was born in Macleod and was the eldest son of Mr. Samuel McCrea, of Macleod, formerly of the Royal North West Mounted Police force. He was forty-three years of age and is survived by his wife and daughter, Miss Margaret, aged 18, of Pincher Creek; his father, Samuel McCrea, at Macleod; three sisters, Mrs. (Dr.) Reed, of Calgary, and Mrs. C. Church and Mrs. T. Scott, of Pincher Creek. Mrs. H. G. Clarke, of Lethbridge, is a sister of Mrs. McCrea.

## THE PASS FIFTEEN YEARS AGO

(The Blaimore Enterprise, 1912)

September 5.—The frontier days' celebration in Calgary this week is proving to be the greatest event of its kind ever held in Canada.

Robert Macintosh, a C.P.R. special constable, was murdered in the company's yards at Calgary last night.

The customs office was moved from Frank to Blairmore on Saturday last.

A little boy in the Blairmore school was asked: "What is the Socialist platform?" The lad answered, smilingly, "A whiskey box."

The marriage of Norman Scott McLeod to Miss Winnifred Jessica Hinton, both of Pincher Creek, was solemnized by Rev. J. F. Hunter at Central Baptist church on September the 1st.

Bill Chappell's "Queen of the Woods" won two first prizes at Homer on Labor Day.

At the district meeting of the Methodist church at Claresholm last week, Rev. W. H. Irwin was delegated to proceed to Toronto in the interest of missionary work in The Pass and to appeal for financial aid.

September 12.—The new Cosmopolitan hotel will be ready for opening in about two weeks. It is a splendid structure. The masonry work was done under the supervision of Alex. Albert, the woodwork by Frayer & Sinclair, while the furnishings were installed by the Godeve Hardware Co., of Coleman.

At the regular meeting of the town council on Monday night, the curfew by-law passed its third reading and became effective.

Tom Three Persons, of Peigan, won the world's championship in the cowboys' bucking-horse contest at the Calgary Stampede.

S. H. Turner sustained injuries through a fall of rock at the local mine last week and is since confined to his bed.

The F. M. Thompson Co. closed their Little store on Saturday. The post office at that place has also been closed.

The wife of Robert Holmes died at Coleman on Saturday last of heart failure, leaving a husband and six children.

## RESULTS OF FIRST AID COMPETITIONS AT BELLEVUE

Following are the results of the First Aid competitions held at Bellevue on Labor Day. Dr. Guff, of Edmonton; Dr. Walkey, of Pincher Creek; Chief Robert Paulds, of Taber, and Mr. W. H. Short, of Lethbridge, acted as judges.

Senior Class—Greenhill Mine No. 1 team, first. Prizes, gold wrist watches, awarded to M. H. Congdon, captain; Harvey Carmichael, John McAndrew, Walter North, Charles Thomason and T. Evans. McGillivray, Coleman, second, pocket watches. International, Coleman, third, gold lockets. Bellevue No. 1, fourth, fountain pens and pencils. Bellevue No. 2, fifth, military brushes.

Boys up to 16 years, Class A—Blairmore No. 2, first, military brushes in solid leather cases, Blairmore No. 1, second, gold cuff links.

C. G. I. T. Girls—Bellevue, first, French Ivory mirrors. Blairmore (Mrs. T. Barnes' team), second, vanity cases with monograms.

Boys 16 to 19, Class B—Coleman No. 1, first, gold wrist watches. Bellevue No. 2, second, silver watches. Bellevue No. 1, third, gold lockets. Coleman No. 2, fourth, fountain pens and pencils.

Prizes were presented by Mr. C. Emmerson and were valued at \$520. Upon the occasion of presentation of prizes, several speakers voiced their appreciation of the excellent work performed by the various teams and the amount of interest manifested in the competitions by citizens generally.

Crea. With the bereaved general sympathy is expressed.

Wild Life Of Western Canada

Not least among the attractions that Western Canada has for many people, whether permanent tourists or sportsmen, is the abundance and variety of its wild life, and now that the hunting season is at hand it is opportune to make something more than a passing reference to the value of this great asset to all of our Western Provinces.

Judged from any and all standpoints the wild duck and geese, prairie chicken, partridge, and other game birds are of immense value to this country. They constitute a picturesque feature of life on the prairies and are a constant source of delight to the lover of nature. What greater pleasure can be had than to witness the flight of duck in the early dawn or as the sun sinks to rest? A man must be of a very stolid nature indeed who does not get a thrill as he watches them winging their way across the sky.

To the hunter our game birds offer the best of opportunities for the display of the keenest manliness, coupled with the best sportsmanlike qualities. And, finally, they provide a welcome addition to our food supply—a delicacy appreciated by all.

Later in the season comes the opportunity for the big game hunter to match his craft and skill with the deer and moose; in a word, the wild life of the West is a drawing card for thousands of people. Without these game birds and animals the West would not be the West which it is today.

But human nature being what it is, it became necessary for Governments by legal enactments to protect these friends of man from man himself. As a result, the open season for shooting has had to be curtailed, and the size of "bags" greatly restricted in order to save birds and animals from extermination. And it is only through the strict observance of these laws, and a rigid compliance with all regulations, that a further enticement of privilege can be avoided. Laws have been passed and regulations are enforced by Governments, not for the purpose of depriving hunters and citizens generally of the privilege of shooting, but in their own interests that it may be preserved and continued to them.

There are still some individuals in this world, who wrongly style themselves "sportsmen," who consider it sport and something to be proud of and boast about to shoot an inordinately large number of birds in a day or a season. These individuals revel in having their photographs taken, gun in hand, and with their "kill" displayed around them. The real sportsman, and the true citizen, looks upon such exhibitions with regret and a boiling contempt. It is one thing to shoot for food, or for an hour or two of the real thrill that comes to the true hunter, but quite another to engage in a worse than useless orgy of waste and slaughter. The man who will kill and kill for the mere joy of killing and in order that he may boast of his "bag" is no sportsman; on the contrary, he is the enemy of all sportsmen, and, in the final analysis, his own enemy. In the language of the old fable, he is destroying the goose that lays the golden eggs.

The writer of this article has no desire to preach; he is not a killjoy. But he would, even on the scorching grounds of self-interest, not to mention more lofty motives, urge all the people of Western Canada to constitute themselves unofficial game guardians—to fully and loyally observe the spirit and letter of the game laws themselves, and see to it that other people do likewise.

## 71-Year-Old Triplets

Abraham, Isaac and Jacob Waggoner, seventy-one year old triplets, claim the distinction of being the oldest triplets in Tennessee and possibly in the United States. They have lived all their lives within ten miles of one another, have never been ill enough to require a doctor's services and do not smoke, chew or drink.

A French watchmaker has invented a watch that tells time without hands. A moving dial turns inside a stationary rim. The minutes appear on the rim and the hour is shown through an opening in the dial.

According to British research experts, London's smoke cloud excludes nearly two-thirds of the beneficial ultra-violet rays of sunlight from that city.

Dial numbers have been converted into raised numbers to enable blind persons to tune in different stations on the radio receiver.

## Aviation Enters New Era

The recent inauguration of a country-wide system of air express marks the passage of aviation from its present era of stunt stuff to its inevitable high cost in human life, to the comparatively safe and sound basis of every day commercial use. In the opinion of R. E. M. Cowie, president of the American Railway Express Company.

Statistics prove that while, on an average, women are now marrying at an earlier age than formerly, the age of the bridegrooms is proportionately older.

"She—I've been married three times—and each time my husband has been Williams."

He—"I'll say you're a clever Bill collector."

Another experiment to hasten France-Atlantic mails is being made. Planes will overtake and drop mail on liners far out to sea.

# CHILDREN CRY FOR

**Fletcher's CASTORIA**

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

## North Best For Whites

Tropics Only Suitable For Colored Race Says Scientist

The white races must eventually turn toward the polar regions in search of new homes, Dr. H. B. Brown, president of the Geographical section, told the British Association for the Advancement of Science at a meeting in Leeds, England.

"There is no real evidence that the whites are suited for permanent residence in the tropics," Dr. Brown declared. "All evidence that is conclusive suggests that the colored races will eventually occupy the warm lands."

"Eventually the tide of white settlement will definitely set northward, even to the Arctic sea, and in its flood destroy the present inhabitants."

## Removes Touchy Corns Brings Solid Comfort

Acts like magic—takes out all the pain—makes aching corns feel comfy in a few seconds. That's how Putnam's Corn Extractor acts. You will not be disappointed with "Putnam"—it never fails to lift out corns or remove painful calluses. Get "Putnam's Extractor" from your druggist. Refuse a substitute.

## Another Evolution Theory

British Zoologist Thinks Man Developed From Jelly Fish

If you are mystical, like dandelion, or have poetical inclinations, you may thank your jelly fish progenitors of aeons ago, in the opinion of Dr. G. D. Biddler, British Zoologist. Dr. Biddler outlined his theory that man developed from the lowly jelly fish in an address at Leeds, England, before the British Association for the Advancement of Science, and added:

"Our appreciation of dancing, poetry and jazz music is due to the metabolic rhythm inherited from our flagellate forefathers, and shows that we are still flagellates at heart."

## MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their children speak in enthusiastic terms of them. For instance, Mrs. Zephira Lavoie, Three Rivers, Que., writes:—"Baby's Own Tablets are a wonderful medicine for little ones. They never fail to regulate the baby's stomach and bowels, and make him plump and well. I always keep a box of the Tablets in the house and would advise all mothers to do likewise." Most of the chronic ailments of childhood arise in the stomach and bowels, and can be quickly banished by Baby's Own Tablets. They help to relieve constipation and indigestion, break up colds and simple fever, expel worms, abate nervous pain, and promote healthy sleep. They are guaranteed to be free from injurious drugs and are safe even to the youngest and most delicate child. The Tablets are sold by medicine dealers or by mail at 25c. a box from Dr. Williams' Medicine Co., Brockville, Ont.

In Abyssinia, a telephone message must first be written and handed to the operator, who in turn, shouts it into the transmitter, no one else being permitted to use the instrument.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

## French Scientist Poorly Paid

Edouard Branly Has Worked Fifty Years Under Trying Conditions

Edouard Branly is cited by newspapers as typifying the struggle of French scientists to work under miserable conditions. Branly is inventor of the condenser. France calls him the "father of the wireless."

Branly has as his only assistant in a ramshackle "laboratory" an aged woman who ekes out a living by doing extra hours of housework in other homes. This maid of all work is now the scientist's "laboratory chief." She was intelligent and the professor trained her in his work.

For fifty years Branly has worked under these conditions, drawing a salary of about \$75 a month as professor and supporting his family by occasional practice as a physician. These facts are told by French writers as illustrating the need to pay well men who give their lives to science.

The speediest bacteria can travel only about four inches in 16 minutes.

Minard's Liniment eases sore feet.

W. N. U. 1698

## WHEN USING WILSON'S FLY PADS

READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

Best of all Fly Killers—10c and 25c per packet at all Druggists, Grocers and General Stores.

## Operates Restaurant 'Plane

Added To Paris-London Service By French Aviation Company

A "restaurant 'plane" has been placed in daily operation on the air line between Paris and London by a French aviation company, the Air-Lyon, according to advices to the Department of Commerce from W. H. Kelley, automotive trade commissioner at Europe.

A cold luncheon is served, including hot soup, lobster, duck, veal, ham, salad, cheese, fruits and coffee, with wine, water or tea. In the near future an electric stove will be installed for preparing warm food. The plane carries a pilot, a radio operator, cook, waiter and ten passengers and their baggage. It is one of the fastest in Europe, covering 335 miles in two hours.

Like a Grip at the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, through the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

## Proposes Scientific Holiday

Bishop Of Ripon Would Drop Work For Ten Years

Feelings ranging from amusement to amusement have been aroused in British circles by the suggestion from the Rt. Rev. Edward Arthur Durrant, Bishop of Ripon, for a ten year scientific holiday.

Sir Daniel Hall, scientific advisor to the Board of Agriculture, is quoted as terming the proposition equivalent to asking the business man who finds difficulty in keeping up his end commercially to stay in bed for a certain length of time in order to save money and expense.

The Duchess of Athol, president of the Education Section of the British Association for Advancement of Science, remarks: "We may be inevitable and feel tired in the race to secure knowledge but we cannot settle down and do nothing for ten years. That is quite impossible."

Sir Oliver Lodge said that if the Bishop's criticism referred only to the application of science to night work with him. As examples, he mentioned television and aviation. Any stoppage in the advance of knowledge however would be a very serious thing.

Sir Oliver added that "although we are now living in a great period of scientific advancement, rather than staidness and philosophy, the era of philosophy will dawn again and I think we may take heart."

Used by physicians—Minard's Liniment.

A Professor of Psychology claims that brown eyes are an indication of weak will. He might also add that black ones are an indication of a weak defense—Judge.

It is estimated that \$200,000,000 worth of automobiles are stolen annually in the United States.

## ECZEMA ITCHED A GREAT DEAL

Over Face, Neck and Hands, Cuticura Heals.

"Eczema broke out all over my face, neck and hands. It was in blisters and itched a great deal. My skin was awful sore and red, and sometimes the blisters would break and water would come from them. I was not able to do my work, and that is a lot of sleep. The trouble lasted over six months."

"I tried many different remedies without success. I began using Cuticura Soap and Ointment and after using four cakes of Cuticura Soap and three boxes of Cuticura Ointment I was completely healed." (Signed) Miss Laura J. Brine, Boston, Mass.

Give Cuticura Soap and Ointment the care of your skin.

Write for Free Advice. Cuticura Soap and Ointment. Send 10c for Cuticura Soap and Ointment. Write for Free Advice. Cuticura Soap and Ointment. Send 10c for Cuticura Soap and Ointment.

## Cable Business Not Affected By Wireless

Prophecy That Its Days Were Numbered Proved Rash

When, twenty-six years ago, Marconi first succeeded in sending wireless messages from Newfoundland to England, many people prophesied that the days of the submarine cable were numbered.

The rashness of this prophecy is proved by the fact that during the first four months of this year, the value of the submarine telegraph and telephone cables sent out from the United Kingdom amounted to £215,783. Even this sum, though, is far below the average, owing to the fact that the trade has not yet recovered from the effects of the coal strike.

Although the early cables were slow, the invention of wireless telegraphy and telephony spurred the cable companies to fresh effort. The result was the discovery of a new alloy and control from which, treated by a secret process, proved to have a conductive power thirty times greater than that of the best soft iron.

The new metal was named Permalloy, and its efficiency is shown by the fact that it is possible to send more than two thousand letters a minute through the newest trans-Atlantic cable wound with permalloy. This compares with a speed of about three hundred letters a minute through other cables.

New developments have so greatly cheapened cable tolls that they can compete successfully with wireless.

## Worships God Of Waterfall

Japanese Hermit Was Discovered Near Honolulu By Engineers

A Japanese hermit, worshipping the god of a waterfall in Kahuna stream, was discovered near Honolulu recently by engineers on a survey trip. They came upon a big altar and found a man with a long beard standing in the middle of the falls, waving his arms and murmuring in a strange manner. He lives in a small tent hidden in the woods and comes to town to buy food. He always has sufficient money to make his purchases, but no one knows how and where he gets it. Kamaelinas (old times) here say that there were formerly two hermits, but no one knows what became of the other.

## CHOLERA, CRAMPS, PAINS IN THE STOMACH RELIEVED BY

Mrs. D. Leavitt, Back Bay, N.B., writes:—"Last summer my children were very ill with cholera and suffered severely from cramps and pains in their stomachs. I tried several remedies, but nothing seemed to do them any good. A friend of mine told me to try Dr. DeFowler's Ext-Of-Strawberry. I got a bottle and gave them a few doses and they soon found relief. Now I will never be without it in the summer months."

Don't Accept a Substitute

This preparation has been the mark of the DeFowler's Ext-Of-Strawberry. The Milburn Co., Limited, Toronto, Ont.

Driving became dangerous in the old days when the horse felt his car at new it's when the driver feels his rye.

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

## The Good Natured Scotch

The Scotch are all right. But the Scotchman is thick-skinned and he can take a joke, and therefore the jokes about him grow apace. Jokes about the Jews and the Irish have virtually been ruled out of our theatres because of organized protest. Not so with jokes about the Scotch. The Scotchman chuckles at the stories about his peevishness. He laughs at those excellent golf stories which usually permit him only one ball in his bag. And, after all, it is better to laugh with the people who laugh at you.

## Four Exports

During the first six months of 1927, 16,819,328 barrels of flour were manufactured in Canada, a little more than half of which was exported from the country. In the twelve months ended June 30th, Canada exported 165,101,452. Exports to the United Kingdom increased from 3,219,212 barrels worth \$21,693,802 in 1926 to 3,552,750 barrels worth \$27,005,189 in 1927.

Use it Wherever the Recipe

Calls for Milk

## Would Sell Canada To the Canadians

Citizens Do Not Yet Realize Greatness Of Dominion

"Let us sell Canada to ourselves, first, then let us sell it to everybody else," urged Howard Stutchbury, Trade Commissioner of Alberta, who spoke in Toronto at the Alberta luncheon, given in the Women's Building, C.N.E., by the Ontario Department of Agriculture for representatives of the various provinces of the Dominion who were in charge of the exhibits in the Women's Institute wing.

"Adopt that as your slogan and in ten years we will have Canada occupy the place she should occupy," was Mr. Stutchbury's advice, as he pointed out the active part the Women's Institutes could play in such a drive. "It is a crime that we have to advertise our goods as 'Produced in Canada,' and it shows only too well that we are not ourselves sold to Canada."

A robin built a nest on a mop on the back porch of the home of a Chicago woman. She secured another mop and left the robin undisturbed until a family of six were reared.

The only thing in the four Gospels to which Hindus invariably take exception is the killing of the fatted calf. This is because they regard the cow as sacred.

Don't get in with people who are always falling out.

## Foot Weary and Sore?

Bathe and rub—well with Minard's. Soothing and relieving.

LADIES WANTED TO DO PLAIN and light sewing at home, whole or spare time; work sent any distance; charges paid. Send stamp for particulars. National Manufacturing Company, Montreal.

THE NEW FRENCH REMEDY THERAPION NO. 1 THERAPION NO. 2 THERAPION NO. 3

## WOULD STOP ALL FLIGHTS ACROSS ATLANTIC OCEAN

Ottawa.—Parliament may be asked to pass legislation at the next session to stop trans-Atlantic flying to and from the Dominion. This was the intimation made by Premier King in referring to recent requests made to the Government to prevent air flights from Canada across the Atlantic Ocean.

The Prime Minister stated that the Government was at present powerless to stop trans-Atlantic flights from this country. The Royal Windsor, the last Canadian plane to attempt to reach England, remarked Premier King, was now outside of Canada in any event.

The Government, intimated the Prime Minister, was of the belief that the people of this country were strongly of the view that these hazardous air flights should discontinue. It was hoped that public opinion against these flights might have the effect of deterring men of wealth from financing attempts to cross the Atlantic.

"There is room overland for experimental flying," commented Mr. King.

## Inter-Provincial Conference

Opening Date Has Been Set For November Third

Ottawa.—November 3 has been definitely set as the date for the opening of the inter-provincial conference, Premier W. L. Mackenzie King announced at the conclusion of a meeting of the cabinet.

Expectations are that the meeting will extend over a week or ten days. The agenda for the conference, said the Prime Minister, was under consideration.

All the provinces had made their recommendations in respect to the subjects which might be discussed with the various federal departments had submitted their proposals.

As soon as the agenda had been finally prepared, intimated Premier King, copies would be forwarded to each of the provinces.

## Pioneer Of West Dead

Captain Bruce Griggs Brought Early Settlers Into Dominion

Winnipeg.—Capt. Bruce Griggs, one of the most picturesque figures of the Red River settlement frontier days, is dead in St. Paul, Wash.

Capt. Bruce was one of the pioneers connected with the steamship transportation system between the Northwestern States and Canada, bringing many settlers into the Dominion previous to the completion of the first transcontinental railway line. He was 73 years of age.

## Two Killed In Collision

Calgary.—Two trainmen were killed, one passenger injured, and more than a score suffering from slight bruises and shock, when C.P.R. passenger trains south of 11th and second No. 2, the Imperial Limited, met in a head-on collision at Dalenhead, 45 miles east of Calgary, on the main line.

## Would Extend Organization

Guelph, Ont.—Discussion of a concerted effort just now getting under way to incorporate all employees of the different branches of the postal service clerks, railway mail carriers, porters, letter-carriers and all others—into one body featured the third annual convention of the Dominion Postal Clerks of Ontario, held here.

## Jamaica Buys Douglas Fir

Montreal.—Word from Kingston, Jamaica, points out that the latest Government returns show that island to be a large user of Canada's Douglas fir. There was an increase of one hundred per cent in Canadian imports in the year and practically all lumber imported was sent from Canada.

## Predict Early Winter

Loveland, Col.—Two flocks of wild geese have been seen flying South for the winter. The early appearance of the birds, which usually do not migrate until Fall, has led to predictions of an early and severe winter. Sportsmen fear the geese will be gone before the hunting season opens.

## Cabinet Minister Attacked

Pavia.—An attempt on the life of Dr. Mel Spaso, Yugoslav minister of commerce, is reported to a Havana dispatch from Belgrade. An unidentified person fired four shots at the minister. Dr. Spaso escaped unhurt but his secretary was seriously wounded.

## More Grain Through Vancouver Port

Reduction In Rate From Calgary Will Increase Shipments

Vancouver.—The recent order of the Dominion Railway Board reducing to 20 cents the rate on export grain from Calgary to the Pacific coast means that the movement of grain through Vancouver this year will jump to 75,000,000 bushels, said G. G. McGeer, addressing the Vancouver South Federal Liberal Executive.

"The order is a guarantee of that, if it is carried out," said the freight rates expert of the Provincial Government. "And," he added, "that means Vancouver will become one of the greatest grain ports in the world, third or fourth."

British Columbia still had a complaint, however, he asserted, pointing out that the rate on the 565 miles haul to Quebec City had been placed at 18 cents, while that for the 642 miles haul to Vancouver was 20 cents.

"We don't want the rate on the Quebec City," Mr. McGeer exclaimed. "We don't care how low it has to be to help Quebec to get the business away from New York. But Vancouver wants the same treatment. Vancouver is just as much in competition with New York as is Quebec."

## Trying To Adjust Immigration Rules

Change Would Simplify Problem Of Canadians Working In Border Cities

Toronto.—The Toronto Mail and Empire publishes the following dispatch from Washington:

"A new program of amendments to immigration and naturalization laws is being worked out by experts in the Labor Department in anticipation of action upon that subject in the next Congress."

"Secretary of Labor Davis, returning today from an inspection of border operations, outlined his plans to his assistants and announced that immigration in future, if he has his way, will be on much stricter basis."

"Changes in the law to be proposed include: Revision of quota laws so as to smooth out present difficulties with Canada and permit Canadian aliens to work in American border cities, such as Detroit and Buffalo, without undue hardship."

## Fire Prevention Week Begins October Ninth

Proclamation Contained In Extra Edition Of Canada Gazette

Ottawa.—An extra edition of the Canada Gazette containing a proclamation, appointing the week commencing October 9 "fire prevention week" and calling upon citizens of the Dominion to inspect their premises. Fire drills are called for in schools and institutions. Boy Scout leaders are asked to give special instruction, teachers and municipal officials are asked to give training in fire prevention in the school and publicity is asked for legislation and regulations pertaining to the question.

The preamble to the proclamation states that the average annual loss of insurable property exceeds \$40,000,000 and that 300 persons annually lose their lives as a result of fires.

## Leave For Hudson Bay

Montreal.—Following upon the departure of the Canadian government merchant marine steamer, Canadian Raider, for Hudson Bay, via Sydney, N.S., where a cargo of coal will be loaded, the department of railways and canals has dispatched the seagoing tug, Ocean Eagle, to Hudson Bay. The tug was formerly the St. Arvans of the Saint John Drydock Company. It is not known how long the Ocean Eagle will remain at Port Churchill.

## John Oliver's Will

Vancouver.—Probate was granted in supreme court by Mr. Justice Morrison of the late Premier John Oliver's will in a four-page document executed July 15 last and signed "Hon. John Oliver," the testator disposed of a gross estate of \$75,918, which is subject to liabilities of \$510, so that the net valuation is \$75,408. Mr. Oliver died August 17 at Victoria. The widow, five sons and three daughters are the sole beneficiaries.

## Starts Aerial Mail Service

Montreal.—Canada's first attempt to start an aerial mail service was made September 7, when Major Tudhope, of the Canadian Air Force, hopped off from the Canadian "Vickers" yards at Maisonneuve aboard a Vickers biplane for Father Point, where he made arrangements to take mails off the Empress of France when the liner was in the St. Lawrence waterway.

## STRONGER URGE FOR REDUCTION IN ARMAMENTS

Geneva.—That competitive armaments create an atmosphere of war and that reduction of armaments must be dogmatically fought for and achieved was the outstanding feature of the address at the League of Nations assembly.

The Japanese delegate, Minichiro Adachi said Japan ardently desired that ruthless competition in armaments should be brought to a standstill and lowered to a level strictly essential to national security. He pledged his country's co-operation with the League's preparatory disarmament commission, which another speaker, Erich Lofgren, Foreign Minister of Sweden, insisted was "essential to convolve and before the military powers settled the divergences of views which had appeared at previous meetings of the commission."

Mr. Lofgren criticized the council of the League for its passive attitude on political problems in the past year, alluding, it is believed, to the controversy between Italy and Yugoslavia, and showed no terror of the great powers when he scoured the practice of certain members of the League in discussing burning political questions among themselves.

After declaring the old pre-war methods were still in vogue, Felix Clegens, Foreign Minister of Latvia, warned the assembly that the military budgets of 1926, including naval and air forces, amounted in Europe to one billion and a half dollars, about the same as in 1913, and that the aggregate number of soldiers, more than 10,000,000, was only slightly less than the figure for 1918. Moreover, he remarked, the technical equipment of armies was far more developed than before the great war.

"We are living under the conditions of armed peace which prevailed before the war," he declared, "and under a system of competitive armaments which many of us believe will sooner or later lead the world into war."

## Might Be Message From Distressed Plane

Carrier Pigeon Found Near Mission City Bearing SOS Message

Mission City, B.C.—Bearing the letters SOS and the figures 40022 on a metal band upon its leg, a carrier pigeon, which, it is thought, may have been freed from a distressed plane or ship, is at the ranch of L. Erickson, farmer, living at Silver Hill, seven miles from here.

The bird, and another carrier pigeon, alighted at the ranch in an exhausted condition and very thin, though they had down a considerable distance. One of the pigeons flew away again.

## Will Of J. Ogden Armour

Left An Estate Valued At One Million Dollars

Chicago.—The will of J. Ogden Armour, who once was worth an estimated \$200,000,000, was filed for probate and disposed of an indicated estate of \$1,000,000.

The will left \$100,000 outright to his daughter, Lolita, now Mrs. John J. Mitchell, Jr., and an annuity of \$12,000 to her husband. The remainder of the estate, except for a few minor bequests of from \$1,000 to \$5,000 to servants, was left in trust for the benefit of the widow and daughter.

## Return From Visit To England

Hon. J. E. Brownlee, premier of Alberta, and Mrs. Brownlee, recently returned from England. In this photograph, taken on the White Star liner Regalia, on which they returned, Mr. and Mrs. Brownlee are shown on the

## Wins Prize For Coinage Design

J. E. H. MacDonald, Toronto, Ontario, artist, who won the \$1,000 prize in the Dominion-wide competition for the best designs for Canada's new nickels and quarters. The new coinage will mark the Diamond Jubilee of Confederation.

## Stripped Of Aviation Honors

French Flier, Charged With Falsifying Report Of Altitude Record

Paris.—Jean Calizot, who gained fame as an altitude flier, stands disgraced and stripped of his honors.

The sports committee of the French Aero Club after a hearing on the charges that he falsified the barograph records of his latest record breaking attempt, decided that they were fully proved.

It inflicted the severest penalty within its power—disqualification for life—and struck from its list the previous records with which he was credited.

The French altitude record, by virtue of the club's action, now goes to Sadi Lecomte and the world's record to former Lieutenant J. A. Macready, of the United States army air force.

The charges against Calizot, as published in the French press, were that he inserted on his barograph a sheet on which a curve had already been plotted, in invisible ink, to indicate a record-breaking flight of 12,000 metres, or 38,704 feet. It was alleged that after taking off for the purported attempt, he shot steam against the paper, thus making the ink legible and subsequently submitted the sheet as proof of his record breaking claim.

## Germany Affected By Polish Tariff

Hit Harder Than Other Countries By New Ruling

Warsaw.—Customs tariffs will be increased by 100 per cent, effective in four months, to all countries not protected by trade treaty with Poland, an official bulletin announced.

The ruling will hit hardest Poland's western neighbor, Germany, with whom negotiations for a commercial accord have been in progress five years without result.

One of the difficulties preventing the conclusion of a Polish-German agreement is Germany's insistence that Poland deport no German citizens now residing on Polish soil. Several other points, also foreign to trade, are causing delays, through the two governments are practically agreed as far as commerce itself is concerned.

## Against Communist Party

Halberstadt, Germany.—The Pan-German League, which is holding a convention here, has adopted resolutions, demanding the dissolution of the communist party and the suppression of its organs. The league represents the nationalist extremists.

## French Grateful For British Sympathy

Have Presented "Golden Book" To Chamberlain In Appreciation

Paris.—For months French artisans and statesmen have been busy preparing a "golden book" which has been given by Foreign Minister Briand to British Government officials to Sir Austen Chamberlain and Clemenceau, respectively.

The Minister of Foreign Affairs explains the motive of the gift—gratitude of France for British sympathy and aid. The Premier stresses the importance to world peace of Anglo-French co-operation and at the same time expresses French admiration, sympathy and affection for Britain. M. Clemenceau, the wartime Premier, writes: "True love exists not in the column but in the grove."

The book contains views of the most interesting sites in France and the Colonies and is photographed by outstanding French statesmen, soldiers and diplomat.

## Demands Repeal Of Trades Union Act

Alternative Set By Congress In Resignation Of Baldwin Government

Edmonton.—The Trades Union Congress in session here, replying to Premier Borden's appeal for industrial peace, carried by general acclamation a discussion demanding the immediate repeal of the Trade Unions Act (restricting certain trade union activities) and falling this, urging instead a general election be called immediately.

The resolution emphasized that workers were desirous for industrial peace. It said, however, that peace was hindered by the government's industrial legislative policy; its attitude on the workers' wages; its action in lengthening the miners' hours of work and who "deliberate class bias displayed in trade disputes and in the Trades Unions Act."

## Abandon Search For Fliers

Hop Of Finding Trace Of Missing Date Aviation Plane Vanished

San Diego, Cal.—The last hope that searching American war craft would find some trace of the seven missing Hawaiian fliers apparently vanished as the scout cruiser, Omaha, flagship of Rear Admiral Lake McNamara, and six destroyers rested here on their arrival from Honolulu after searching an area of approximately 450,000 square miles in extent.

Admiral McNamara reported that no single trace of the missing Dole fliers was discovered.

## DOMINION HAS DEVELOPED A MARKED IDENTITY

Vancouver.—There can be no question of the existence of distinguishing characteristics which give to Canada a marked identity of her own among the nations of the world, Sir Robert Falconer, president of the University of Toronto, said here, addressing the Canadian Club on the subject, "Elements of Canadian Nationality."

"All across Canada the pronounced characteristics of the people are more and more apparent," the speaker said. "And there is unity everywhere. No matter where one travels in Canada one feels at home, but when you cross the line into the United States there is not the same feeling."

Sir Robert credited the Maritime provinces with being responsible for the Canada of today. He said if there had been no Maritimers there probably would have been no British Canada. The founding of Halifax in 1749 was one of the most strategic moves ever made by Great Britain. He also gave credit to the United Empire Loyalists for playing an important part in laying truly the foundations of the Dominion.

"Halifax held Nova Scotia and New Brunswick loyal," said Sir Robert, "and the Maritimes always must remain a very important part of Canada."

The speaker told of the extreme difficulties which the early British settlers in Canada faced. However, these conditions bred men of resource and adaptability. Sir Robert dwelt on the question of the French in Canada, commenting upon the difficulties encountered through two entirely different peoples living side by side. The wonder was that there was not more trouble in the early days. As time progressed the two had come to know each other better, an element of tolerance had developed, and there was a better feeling today than ever before.

## EXPRESS FAITH IN PROSPERITY OF THE DOMINION

Vancouver.—Predictions of a 600,000,000 bushel wheat crop from the prairie provinces and statements of faith in the prosperity of Canada came from a group of Eastern Canadian financiers who arrived in Vancouver. They are Sir John Aldred, Sir Joseph Flavelle, Sir Thomas White and S. H. Logan.

Sir John Aldred and Mrs. Logan, president and general manager, respectively of the Canadian Bank of Commerce, both predicted a 600,000,000 bushel crop.

Sir Joseph Flavelle, speaking of the coming meeting of the Canadian Chamber of Commerce, said:

"One of our great national handicaps has been the vast distance that divides our communities. I am sure any government that creates facilities to bring Canadian business men in contact with one another is deserving of support."

Sir John Aldred emphasized the importance of getting more people into the prairie provinces.

"We want immigrants of the right class—men and women accustomed to a fairly good standard of living, and who can adapt themselves to our standards in Canada. The best class of new settlers comes from the United Kingdom and the United States," he said. Sir John was impressed with conditions across Canada. "Conservative optimism" was the tenor of his remarks.

## Eskimos Suffer From White Man's Diseases

Contact Is Slowly Changing Their Character Says Dr. Banting

Toronto.—The Eskimos are not yet racially immune from the "white man's diseases," according to Dr. F. G. Banting, co-discoverer of insulin, who has just returned from a trip in the Arctic on the Government steamer Beothic.

Gradually increasing contact with white men is slowly changing the Eskimo character, according to Dr. Banting's observations. The trading companies, he said, are converting the natives from tribes of hunters to trappers. They are being clothed with western clothing, tobacco, weapons, etc., and sent out to trap foxes. As a result their industry of hunting the caribou and other animals used largely in native economy is neglected. The native costume, and to some extent native diet, are being transformed as a consequence.

The native costume of the Eskimo, made of caribou hides with seal skin boots, weighs about one half that of the average wintered Canadian citizen, but will withstand as much as 60 degrees below zero. Having largely abandoned that clothing, the Eskimos are now suffering from tuberculosis and in 1926 a violent influenza epidemic caused many deaths among them.

## Proposed Network Of Airways

London.—A network of international airways throughout England may come into being in the near future with a view to increasing the air routes to the continent. The Imperial Airways have drawn up a scheme whereby passengers from the provinces to the continent travel by air the whole way. It is also claimed that internal lines will be valuable for the transporting of goods.

## Lowest Birth and Death Rate

London.—The lowest birth rate ever reported in England and Wales, except in war time, is shown by the report of Sir George Newman, chief medical officer of the ministry of health, for 1926. There was 694,000 births and 453,000 deaths. The latter also was the lowest ever recorded. The 1925 report shows 710,587 births and 473,000 deaths.

## Canadian Heads Committee

Geneva.—Hon. Raoul Dandurand, Canadian Senator, has been appointed chairman of one of 41 committees appointed by the Assembly of the League of Nations. Senator Dandurand is chairman of the committee which deals with the following subjects: Alcoholism, economic conference and the work of the various organizations of the League of Nations.

## N.B. Under Liquor Law

Saint John, N.B.—The liquor act, 1927, is now in effect and the prohibitionists are in force in the province since 1916, has passed out of existence. Nineteen Government retail liquor stores were opened. Liquor will be sold without permits, before the practice adopted in N.B.
